</table>

"TLV" means the Threshold Limit Value exposure (eight-hour, time-weighted average, unless otherwise noted) established by the American Conference of Governmental Industrial Hygienists. "STEL" indicates a short-term exposure limit. "PEL" indicates the OSHA Permissible Exposure Limit. "n/e" indicates that no exposure limit has been established. An asterisk (*) indicates a substance whose identity is a trade secret of our supplier and unknown to us.

3. HAZARDS IDENTIFICATION

Emergency Overview

Appearance, form, odor: viscous liquid with little odor.

**WARNING!** Eye and skin irritant. Potential skin sensitizer.

Potential health effects

- Primary routes of exposure: ☑ Skin contact ☐ Skin absorption ☑ Eye contact ☐ Inhalation ☐ Ingestion

Symptoms of acute overexposure:

- **Skin:** Moderate irritant. Contact at elevated temperatures can cause thermal burns which may result in permanent damage. May cause skin sensitization (itching, redness, rashes, hives, burning, swelling).
- **Eyes:** Moderate irritant (stinging, burning sensation, tearing, redness, swelling). Contact at elevated temperatures can cause thermal burns which may result in permanent damage or blindness.
Inhalation:

The low vapor pressure of the resin makes inhalation unlikely in normal use. In applications where vapors (caused by high temperature) or mists (caused by mixing) are created, breathing may cause a mild burning sensation in the nose, throat and lungs.

Ingestion:

Acute oral toxicity is low. May cause gastric distress (nausea, vomiting, diarrhea).

Effects of chronic overexposure:

Prolonged or repeated skin contact may cause sensitization, with itching, swelling, or rashes on later exposure.

Carcinogenicity

OSHA regulated: No  
ACGIH: No  
National Toxicology Program: No  
International Agency for Research on Cancer: No  
Cancer-suspect constituent(s): None

Medical conditions which may be aggravated by exposure:

Preexisting eye and skin disorders (e.g. eczema). Development of preexisting skin or lung allergy symptoms may increase.

Other effects:

See section 11.

4. FIRST AID MEASURES

First aid for eyes:
Flush eye with clean water for at least 20 minutes while gently holding eyelids open, lifting upper and lower lids. Get immediate medical attention.

First aid for skin:
Immediately remove contaminated clothing and excess contaminant. Flush skin with water for at least 15 minutes. Wash thoroughly with soap and warm water. Consult a physician if irritation develops.

First aid for inhalation:
Remove patient to fresh air. Administer oxygen if breathing is difficult. Get medical attention if symptoms persist.

First aid for ingestion:
Do NOT induce vomiting. Rinse mouth out with water, then sip water to remove taste from mouth. Never give anything by mouth to an unconscious person. If vomiting occurs spontaneously, keep head below hips (if sitting) or to the side (if lying down) to prevent aspiration. Get medical attention.

5. FIRE FIGHTING MEASURES

Extinguishing media:

- Water  
- Carbon dioxide  
- Dry chemical  
- Foam  
- Alcohol foam

Flash Point (°F): > 300  
Method: estimate

Explosive limits in air (percent) --  
Lower: n/d  
Upper: n/d

Special firefighting procedures:
Material will not burn unless preheated. Do not enter confined space without full bunker gear. Firefighters should wear self-contained breathing apparatus and protective clothing. Cool fire exposed containers with water.

Unusual fire and explosion hazards:
Heating above 300 deg F in the presence of air may cause slow oxidative decomposition and above 500 deg F may cause polymerization. Personnel in vicinity and downwind should be evacuated.

Hazardous products of combustion:
When heated to decomposition it emits fumes of Cl-, carbon monoxide, other fumes and vapors varying in composition and toxicity.
6. ACCIDENTAL RELEASE MEASURES

Spill control:
Avoid personal contact. Eliminate ignition sources. Ventilate area.

Containment:
Dike, contain and absorb with clay, sand or other suitable material.

Cleanup:
For large spills, pump to storage/salvage vessels. Soak up residue with an absorbent such as clay, sand, or other suitable material and dispose of properly. Flush area with water to remove trace residue.

Special procedures:
Prevent spill from entering drainage/sewer systems, waterways, and surface waters. Collect run-off water and transfer to drums or tanks for later disposal. Notify local health authorities and other appropriate agencies if such contamination occurs.

7. HANDLING AND STORAGE

Handling precautions:
Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after using and particularly before eating, drinking, smoking, applying cosmetics, or using toilet facilities.
Launder contaminated clothing and protective gear before reuse. Discard contaminated leather articles.
Handle mixed resin and hardener in accordance with the potential hazard of the curing agent used. Provide appropriate ventilation/respiratory protection against decomposition products (see Section 10) during welding/flame cutting operations and to protect against dust during sanding/grinding of cured product.

Storage:
Store in a cool, dry area away from high temperatures and flames.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering controls
Ventilation:
Use ventilation that is adequate to keep employee exposure to airborne concentrations below exposure limits (or to the lowest feasible levels when limits have not been established). Although good general mechanical ventilation is usually adequate for most industrial applications, local exhaust ventilation is preferred (see ACGIH - Industrial Ventilation). Local exhaust may be required for confined areas (see OSHA 1910.146).

Other engineering controls:
Have emergency shower and eye wash available.

Personal protective equipment
Eye and face protection:
Chemical goggles if liquid contact is likely, or Safety glasses with side shields.

Skin protection:
Chemical-resistant gloves and other gear as required to prevent skin contact.

Respiratory protection:
None needed in normal use with proper ventilation. In poorly ventilated areas use NIOSH approved organic vapor cartridge respirator for uncured resin, dust/particle respirator during grinding/sanding operations for cured resin, or fresh airline respirator as exposure levels dictate (see OSHA 1910.134).

10. STABILITY AND REACTIVITY

This material is chemically stable. Hazardous polymerization will not occur.

**Conditions to avoid:**
Open flame and extreme heat

**Incompatible materials:**
Strong Lewis or mineral acids, strong oxidizing agents, strong mineral and organic bases (esp. primary and secondary aliphatic amines). Sodium or calcium hypochlorite. Peroxides.

**Hazardous products of decomposition:**
Oxides of carbon; aldehydes, acids and other organic substances may be formed during combustion or elevated temperature (>500 deg F) degradation.

**Conditions under which hazardous polymerization may occur:**
Heat is generated when resin is mixed with curing agents; Run-a-way cure reactions may char and decompose the resin, generating unidentified fumes and vapors which may be toxic.

11. TOXICOLOGICAL INFORMATION

**Acute oral effects:** LD50 (rat): > 10 g/kg

**Acute dermal effects:** LD50 (rabbit): > 4.5 g/kg

**Acute inhalation effects:** LC50 (rat): Not available. Exposure: hours.

**Eye irritation:**
Not available.

**Subchronic effects:**
Alkyl Glycidyl Ether: a 20 day exposure to rabbit skin to 2 ml of 5% solution/kg/day showed no histological evidence of toxicity.

**Carcinogenicity, teratogenicity, and mutagenicity:**
1) MUTAGENICITY: Liquid resins based on diglycidyl ether of Bisphenol A (DGEBA), have proved to be inactive.
when tested by in vivo mutagenicity assays. These resins have shown activity in in vitro microbial mutagenicity screening and have produced chromosomal aberrations in cultured rat liver cells. The significance of these tests to man is unknown. 2) CARCINOGENICITY: Recent 2-year bioassays in rats and mice exposed by the dermal route to DGEBA yielded no evidence of carcinogenicity to the skin or any other organs. This study clarifies prior equivocal results from a 2-year mouse skin painting study, which were suggestive, but not conclusive, for weak carcinogenic activity. 3) The International Agency for Research on Cancer (IARC) concluded that DGEBA is not classifiable as a carcinogen (IARC group 3), that is human and animal evidence of carcinogenicity is inadequate.

Other chronic effects:
DGEBA: Prolonged or repeated skin contact may cause sensitization, with itching, swelling, or rashes on later exposure. Studies have shown bisphenol A diglycidyl ether resin to cause allergic contact dermatitis. Alkyl Glycidyl Ether: Sensitization has occurred in laboratory animals after repeated exposures.

12 ECOLOGICAL INFORMATION

Ecotoxicity:
No data available.

Mobility and persistence:
No data available.

Environmental fate:
No data available.

13. DISPOSAL CONSIDERATIONS

Waste management recommendations:
If this resin becomes a waste, it would not be a hazardous waste by RCRA criteria (40CFR 261). Dispose of according to applicable federal, state, and local regulations. Incineration is the preferred method of disposal.

Please see also Section 15, Regulatory Information.
14. TRANSPORT INFORMATION

Proper shipping name: Non-regulated

FLOOR PATCH SAND

This product appears in the following stock number(s):

13100  13120  DE061

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Tradename:  FLOOR PATCH SAND

General use:  This information apply to the sand component of the concrete patching compound kit. After mixing, handle uncured material as for the hardener; after curing, product is not hazardous.

Chemical family:  Silica

2. COMPOSITION/INFORMATION ON INGREDIENTS

HAZARDOUS CONSTITUENTS

Exposure limits

"TLV" means the Threshold Limit Value exposure (eight-hour, time-weighted average, unless otherwise noted) established by the American Conference of Governmental Industrial Hygienists. "STEL" indicates a short-term exposure limit. "PEL" indicates the OSHA Permissible Exposure Limit. "n/e" indicates that no exposure limit has been established. An asterisk (*) indicates a substance whose identity is a trade secret of our supplier and unknown to us.

3. HAZARDS IDENTIFICATION

Emergency Overview

Appearance, form, odor:  Tan granules with no odor.

[CAUTION! Mechanical irritant. Dusts may cause respiratory irritation.]

Potential health effects

Primary routes of exposure:  ❏ Skin contact  ❏ Skin absorption  ❏ Eye contact  ✗ Inhalation  ❏ Ingestion

Symptoms of acute overexposure:

Skin:  Abrasive, but not otherwise hazardous on skin contact.

Eyes:  Mechanical irritant which may cause abrasion of the cornea.

Inhalation:

If dust is produced, high concentrations are respiratory irritants. The product has no respirable dust as shipped.

Ingestion:

No data.
Effects of chronic overexposure:
Silicosis, lung cancer, scleroderma, tuberculosis and nephrotoxicity.

Carcinogenicity -- OSHA regulated: Yes  ACGIH: No  National Toxicology Program: Yes
International Agency for Research on Cancer: Yes
Cancer-suspect constituent(s) : Respirable Silica

Medical conditions which may be aggravated by exposure:
The condition of individuals with lung disease may be aggravated by exposure.

4. FIRST AID MEASURES

First aid for eyes:
Avoid rubbing particles into the eyes. Flush eye with clean water for at least 20 minutes while gently holding eyelids open, lifting upper and lower lids. Contact a physician if irritation persists.

First aid for skin:
Flush skin with water for at least 15 minutes. Wash thoroughly with soap and warm water. Consult a physician if irritation develops.

First aid for inhalation:
Remove patient to fresh air. Administer oxygen if breathing is difficult. Get medical attention if symptoms persist.

First aid for ingestion:
Consult a physician.

5. FIRE FIGHTING MEASURES

General fire and explosion characteristics:
Crystalline silica (quartz) is non-flammable and non-explosive).

Extinguishing media:

- [ ] Water
- [ ] Carbon dioxide
- [ ] Dry chemical
- [ ] Foam
- [ ] Alcohol foam

Flash Point (°F): None  Method: not applicable

Explosive limits in air (percent) --  Lower: none  Upper: none

Special firefighting procedures:
Does not support combustion with oxygen. Use extinguishing media appropriate to the surrounding fire.

Unusual fire and explosion hazards:
None

Hazardous products of combustion:
None

6. ACCIDENTAL RELEASE MEASURES

Spill control:
Avoid inhalation of dusts, if any are raised use an appropriate respirator.

Containment:
Not applicable

Cleanup:
Shovel up for reuse or disposal, do not dry sweep.

Special procedures:
None.
9. PHYSICAL AND CHEMICAL PROPERTIES

<table>

</tbody>
</table>

10. STABILITY AND REACTIVITY

This material is chemically stable. Hazardous polymerization will not occur.

Conditions to avoid:
None

Incompatible materials:
Extremely powerful oxidizers(e.g. fluorine, oxygen difluoride, manganese trioxide, chlorine trifluoride). Silica will dissolve in hydrofluoric acid & produce silicon tetrafluoride
11. TOXICOLOGICAL INFORMATION

Acute oral effects:     LD50 (rat): No data available.

Acute dermal effects:  LD50 (rabbit): No data available.

Acute inhalation effects:  LC50 (rat): No data available.  Exposure:  hours.

Eye irritation:
No data available.

Subchronic effects:
No data available.

Carcinogenicity, teratogenicity, and mutagenicity:
No data available.

Other chronic effects:
Respirable crystalline quartz may cause chronic lung injury (silicosis). Acute or rapid silicosis may occur in a short period of time in heavy exposure in certain occupations such as sandblasters. Silicosis is a form of disabling pulmonary fibrosis which can be progressive and may lead to death. Pulmonary function may be reduced by inhalation of respirable crystalline silica. It may produce lung scarring which may lead to a progressive massive fibrosis, increasing susceptibility to pulmonary tuberculosis. Progressive massive fibrosis may be accompanied by right heart enlargement, heart failure, and pulmonary failure. Smoking aggravates the effects of exposure.

FLOOR PATCH HARDENER

This product appears in the following stock number(s):
13100  13120  19999  DE061

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Tradename: FLOOR PATCH HARDENER

General use: This product is part of an epoxy repair system for concrete flooring. The following data apply to the hardener component only; a nonhazardous solid is formed when the epoxy is properly mixed and cured.

Chemical family: Modified aliphatic polyamine

3. HAZARDS IDENTIFICATION

Emergency Overview

Appearance, form, odor: Amber liquid with ammonia-like odor.

**DANGER!** Corrosive. Eye, skin and respiratory irritant. Toxic by skin absorption. May cause skin or respiratory sensitization.

Potential health effects

Primary routes of exposure: ☑ Skin contact ☑ Skin absorption ☑ Eye contact ☑ Inhalation ☐ Ingestion

Symptoms of acute overexposure:

**Skin:** Causes severe irritation or burns. DETA can be absorbed through the skin on prolonged or repeated contact.

**Eyes:** The liquid can cause severe irritation or burns, with possible permanent eye damage. DETA vapor can cause eye irritation and blurred vision.
Inhalation:
Can cause respiratory irritation; high vapor concentrations can cause severe respiratory irritation, nausea, and vomiting.

Ingestion:
May cause burns of mouth and throat, abdominal pain, nausea, vomiting, and diarrhea.

Effects of chronic overexposure:
Components of product may cause respiratory sensitization and chronic lung toxicity to exposed workers. Repeated contact may cause allergic reaction / sensitization. Repeated or prolonged exposure may cause adverse respiratory effects (dryness, sore throat, cough, tightness of chest, shortness of breath), eye effects (conjunctivitis, corneal damage), or skin effects (dryness, rash, irritation, corrosion). Effects from inhalation may be delayed. Repeated overexposure to DETA can cause liver and kidney effects.

Carcinogenicity -- OSHA regulated: No  ACGIH: No  National Toxicology Program: No
International Agency for Research on Cancer: No
Cancer-suspect constituent(s): None

Medical conditions which may be aggravated by exposure:
Chronic respiratory diseases (e.g. Bronchitis, Emphysema), eye disease, skin disorders and allergies.

Other effects:
Component has caused skin and respiratory sensitization in humans. Product may produce temporary and reversible hazy or blurred vision. Symptoms disappear when exposure is terminated.

4. FIRST AID MEASURES

First aid for eyes:
Immediately flush with clean water for at least 15 minutes while gently holding eyelids open. Get medical help as soon as possible!

First aid for skin:
Immediately remove contaminant, contaminated clothing and shoes and flush with water for 15 minutes. Wash well with mild soap and warm water. See a doctor if reddening or swelling occurs.

First aid for inhalation:
Remove patient to fresh air. Give oxygen or artificial respiration if needed. See a doctor if symptoms persist. Prevent aspiration of vomit - turn victim's head to the side.

First aid for ingestion:
Corrosive--do NOT induce vomiting. If patient is conscious, dilute by giving lots of milk or water. Get immediate medical help.

5. FIRE FIGHTING MEASURES

Extinguishing media:
- Water
- Carbon dioxide
- Dry chemical
- Foam
- Alcohol foam

Flash Point (*F): 217  Method: PMCC

Explosive limits in air (percent) -- Lower: n/d  Upper: n/d

Special firefighting procedures:
Firefighters should wear self-contained breathing apparatus and sufficient protective gear to prevent all skin and eye contact with this material. Use water spray to cool fire-exposed containers and to disperse vapors.

Unusual fire and explosion hazards:
Vapors from heated material and from its decomposition are severe respiratory irritants.

Hazardous products of combustion:
Acrid and toxic fumes with organic amines, ammonia, aldehydes, oxides of carbon and nitrogen
6. ACCIDENTAL RELEASE MEASURES

Spill control:
Avoid personal contact. Wear proper protective clothing. Eliminate ignition sources. Ventilate area.

Containment:
Dike, contain and absorb with clay, sand or other suitable material.

Cleanup:
For large spills, pump to storage/salvage vessels. Soak up residue with an absorbent such as clay, sand, or other suitable material and dispose of properly. Flush area with water to remove trace residue.

Special procedures:
Prevent spill from entering drainage/sewer systems, waterways, and surface waters. Collect run-off water and transfer to drums or tanks for later disposal. Notify local health authorities and other appropriate agencies if such contamination occurs.

7. HANDLING AND STORAGE

Handling precautions:
Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after using and particularly before eating, drinking, smoking, applying cosmetics, or using toilet facilities. Launder contaminated clothing and protective gear before reuse. Discard contaminated leather articles. Handle mixed resin and hardener in accordance with the potential hazard of the curing agent used. Provide appropriate ventilation/respiratory protection against decomposition products (see Section 10) during welding/flame cutting operations and to protect against nuisance dust during sanding/grinding of cured product. ---Do not use sodium nitrite or other nitrosating agents (nitrous acid, nitrites or nitrous oxide atmospheres) with product, cancer-causing nitrosamines could be formed.

Storage:
Store in a cool, dry area away from high temperatures and flames. Keep away from acids and oxidizers. Do not store in reactive metal containers. Keep containers closed when not in use.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering controls
Ventilation:
General mechanical ventilation is adequate for occasional use. For prolonged or repeated use or in confined areas, local exhaust is recommended. Ventilation must in any case keep DETA concentration below TLV.

Other engineering controls:
Have emergency shower and eye wash stations available.

Personal protective equipment
Eye and face protection:
Splashproof chemical goggles or safety glasses with sideshields.

Skin protection:
Chemical-resistant rubber (for example, nitrile, neoprene or butyl) gloves and other protective gear as needed to prevent skin contact.

Respiratory protection:
None needed in normal use with proper ventilation. In poorly ventilated areas, or when creating a dust or mist, use NIOSH-approved organic vapor respirator or supplied air respirator as exposure levels dictate.
9. PHYSICAL AND CHEMICAL PROPERTIES

Specific gravity: 1.03
Melting point (°F): < -0.4
Vapor pressure (mmHg): < 0.1 at 77 °F
VOC (grams/liter): 0
Percent volatile by volume: 0
Percent solids by weight: 100

Boiling point (°F): 401
Vapor density (air = 1): 3.5 (DETA)
Evaporation rate (butyl acetate = 1): n/d
Solubility in water: 1.4% w/w @ 68 F
pH (5% solution or slurry in water): Alkaline

10. STABILITY AND REACTIVITY

This material is chemically stable. Hazardous polymerization will not occur.

Conditions to avoid:
Extreme heat or open flame. Product slowly corrodes copper, aluminum, zinc, and galvanized surfaces.

Incompatible materials:

Hazardous products of decomposition:

Conditions under which hazardous polymerization may occur:
Heat is released when this product is mixed with epoxy resins; use care when mixing large quantities.

11. TOXICOLOGICAL INFORMATION

Acute oral effects: LD50 (rat): 1080 mg/kg (estimate)

Acute dermal effects: LD50 (rabbit): 1090 mg/kg (estimate)

Acute inhalation effects: LC50 (rat): No data available.

Eye irritation:
No data available.

Subchronic effects:
No data available.

Carcinogenicity, teratogenicity, and mutagenicity:
Cancer (DETA): Did not cause cancer in long-term animal studies. Teratology (DETA): No relevant information found. Reproductive effects (DETA): In an oral gavage screening study, DETA has been toxic to the fetus in laboratory
animal tests.

Other chronic effects:
DETA has caused liver and kidney damage in laboratory animals.

12 ECOLOGICAL INFORMATION

Ecotoxicity:
DETA: Acute LC50 for water flea (Daphnia magna) is 17 mg/l; DETA: Acute LC50 for fathead minnow (Pimephales promelas) is 332 mg/l. DETA: Acute LC50 for brine shrimp (Artemia salina) is 710 mg/L.

Mobility and persistence:
No data available.

Environmental fate:
No data available.

13. DISPOSAL CONSIDERATIONS

Waste management recommendations:
If this resin becomes a waste, it would not be a hazardous waste by RCRA criteria (40CFR 261). Dispose of according to applicable federal, state, and local regulations. Incineration is the preferred method of disposal.

Please see also Section 15, Regulatory Information.

14. TRANSPORT INFORMATION

Proper shipping name: Amines, liquid, corrosive, n.o.s. *
Technical name: Diethylenetriamine
Hazard class: 8
UN number: 2735
Packing group: III
Emergency Response Guide no.: 153
IMDG page number: N/A
Other: N/A

*Depending upon the size and type of container, this material may be reclassified as "Consumer Commodity, ORM-D" for shipments within the United States, or "Limited Quantity" elsewhere. Refer to the appropriate regulation.
15. REGULATORY INFORMATION

U.S. Federal Regulations

TSCA
All ingredients of this product are listed, or are exempt from listing, on the TSCA inventory.

The following RCRA code(s) applies to this material if it becomes waste:
None

Regulatory status of hazardous chemical constituents of this product:

<table>
<thead>
<tr>
<th>Constituent</th>
<th>Extremely Hazardous*</th>
<th>Toxic Chemical**</th>
<th>CERCLA RQ (lbs)</th>
<th>TSCA 12B Export Notification</th>
</tr>
</thead>
<tbody>

<td>Required</td>
</tr>
</tbody>
</table>

*Consult the appropriate regulations for emergency planning and release reporting requirements for substances on the SARA Section 301 Extremely Hazardous Substance list.

**Substances for which the "Toxic Chemical" column is marked "Yes" are on the SARA Section 313 list of Toxic Chemicals, for which release reporting may be required. For specific requirements, consult the appropriate regulations.

For purposes of SARA Section 312 hazardous materials inventory reporting, the following hazard classes apply to this material: - Immediate health hazard -- Delayed health hazard -

Canadian regulations

WHMIS hazard class(es): D2B; E
All components of this product are on the Domestic Substances List.

16. OTHER INFORMATION

Hazardous Materials Identification System (HMIS) ratings:

Health: 3*
Flammability: 1
Reactivity: 1
